Salford Recommended Torque Values

BOLT SIZE	GRADE 2		GRADE 5		GRADE 8	
	ft-lbs	Nm	ft-lbs	Nm	ft-lbs	Nm
1/2"NC	50	68	75	102	105	142
5/8"NC	90	122	150	203	210	285
3/4"NC	160	217	270	366	375	508
7/8"NC	145	197	395	536	610	827
1"NC	210	285	590	800	910	1234

NOTES: These recommended torque values are applicable when applied to the nut only. These recommended torque values are approximate only. The torque-tension relationship is affected by lubrication, surface finish, thread fit, plating, lock-washers, etc.

DO NOT use these values if a different torque value or tightening procedure is given for a specific application. Torque values listed are for general use only. Check tightness of fasteners periodically.

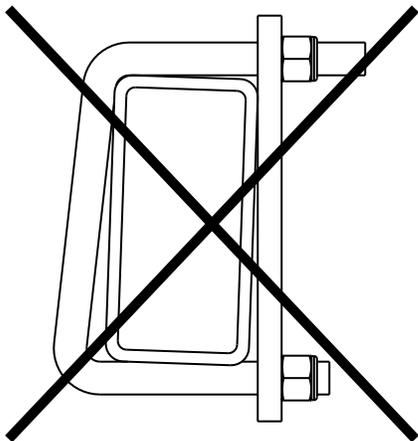

Shear bolts are designed to fail under predetermined loads. Always replace shear bolts with identical grade.

Fasteners should be replaced with the same or higher grade. If higher-grade fasteners are used, these should only be tightened to the strength of the original.

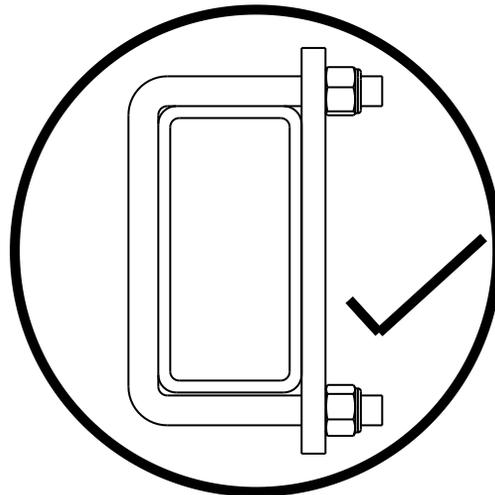

Make sure fasteners threads are clean and that you properly start thread engagement. This will prevent them from failing when tightening.

WARNING

Do not tighten one side of the u-bolt before the other side.

Both sides of the u-bolt must be tightened equally.

Torque Values for Tires

WARNING Maintain proper torque to provide safe and secure attachment of the wheel hub/drum. Improperly tightened wheel nuts can cause the wheel to separate from the wheel mounting surface during operation. This could result in property damage, serious personal injury, or possibly loss of life.

NOTE - If wheel does not have chamfers to match profile of the nuts, use flat side of nuts against rim face.

Install all lug nuts/bolts by hand to prevent cross threading and tighten lug nuts/bolts following the steps and tightening sequence diagram below.

- STEP 1) Torque to 20-25 ft•lbs following the appropriate pattern below.
 STEP 2) Torque to 55-60 ft•lbs following the appropriate pattern below.
 STEP 3) Torque to final ft•lbs rating (see bolt size below) following the appropriate pattern below.

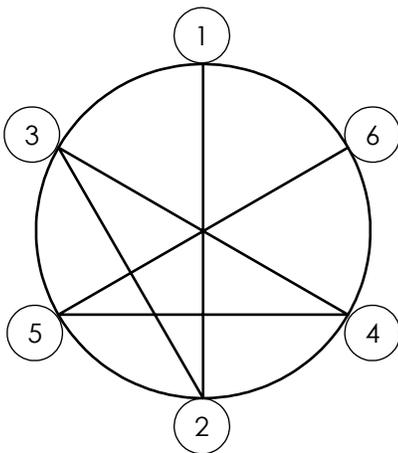

Bolt Size (Hub Size)	Final Torque*
1/2" dia. bolt (up to 3000 lb hubs)	90 ft•lbs
9/16" dia. bolt (4000 - 5000 lb hubs)	120 ft•lbs
5/8" dia. bolt (5500 - 12000 lb hubs)	170 ft•lbs
3/4" dia. bolt (16000 - 20000 lb hubs)	300 ft•lbs
7/8" dia. bolt (25000 lb hubs)	540 ft•lbs
22mm dia. bolt (35000 lb hubs)	540 ft•lbs

*'Dry Torque' values shown.

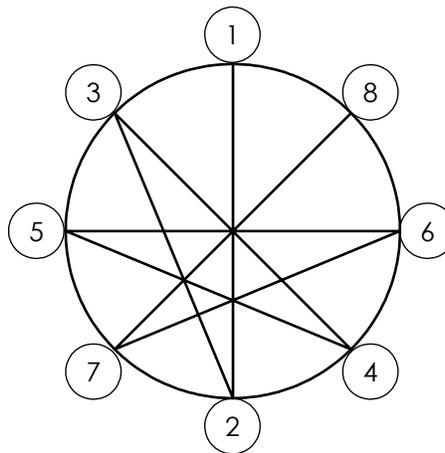

If using a lubricant (eg oil, or anti-sieze), use only 75% of the dry torque.

Lug Nut/Bolt Tightening Sequence

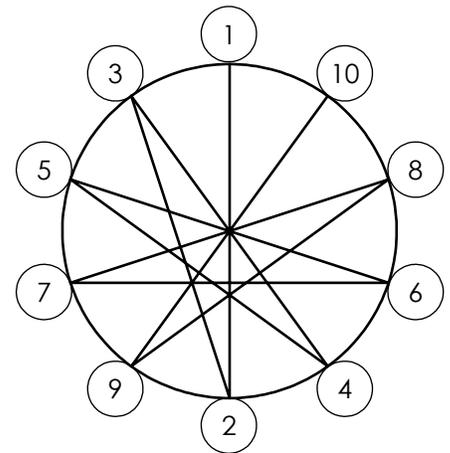

6 LUG BOLT PATTERN

8 LUG BOLT PATTERN

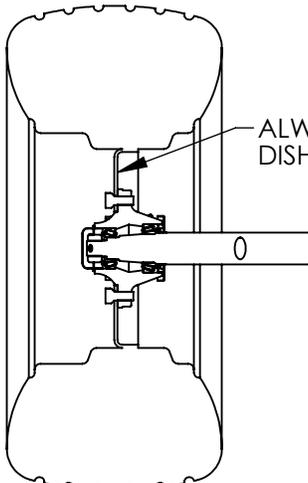

10 LUG BOLT PATTERN

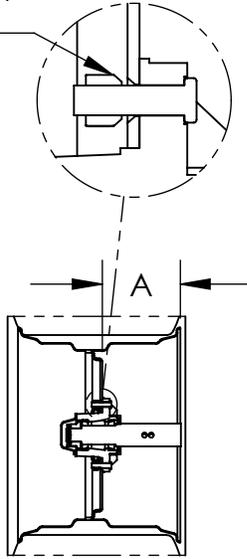

NOTE - Recheck the torque settings of lug nuts/bolts after 10km (6 miles) and again after 50km (30 miles). Periodically and at the beginning of each season check the condition and the torque of the lug nuts/bolts.

Pressure Values for Tires

NOTE:
CONE SIDE OF NUT
IN CONED HOLE

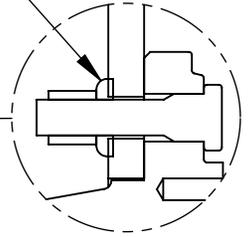

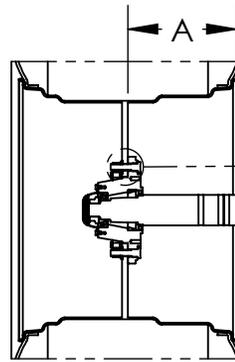

ALWAYS ENSURE

35000 lbs

General Safety Precautions

Signal Words

The words **DANGER**, **WARNING**, or **CAUTION** are used with the safety alert symbol. Learn to recognize the safety alerts, and follow the recommended precautions and safe practices.

Three words are used in conjunction with the safety-alert symbol:

DANGER

Indicates an imminently hazardous situation that, if not avoided, will cause **DEATH OR VERY SERIOUS INJURY**

WARNING

Indicates a potentially hazardous situation that, if not avoided, could cause **DEATH OR SERIOUS INJURY**

CAUTION

Indicates a potentially hazardous situation that, if not avoided, may cause **MINOR OR MODERATE INJURY**

Replace any **DANGER**, **WARNING**, **CAUTION**, or instructional decal that is not readable or is missing. The location and part number of these decals are identified later in this manual.

The words **Important** and **Note** are not related to personal safety but are used to give additional information and tips for operating or servicing this equipment.

IMPORTANT: Identifies special instructions or procedures which, if not strictly observed could result in damage to, or destruction of the machine, process or its surroundings.

NOTE: Indicates points of particular interest for more efficient and convenient repair or operation.

A CAREFUL OPERATOR IS THE BEST INSURANCE AGAINST AN ACCIDENT!

General Safety Precautions

Wing Fold

- Wings may fall rapidly causing injury.
- Do not stand under wings.
- Always stay clear of wings when being lowered, raised, or in an elevated state.
- Always use wing locks when raised.
- Ensure cylinders are completely filled with hydraulic fluid to avoid any unexpected movement.

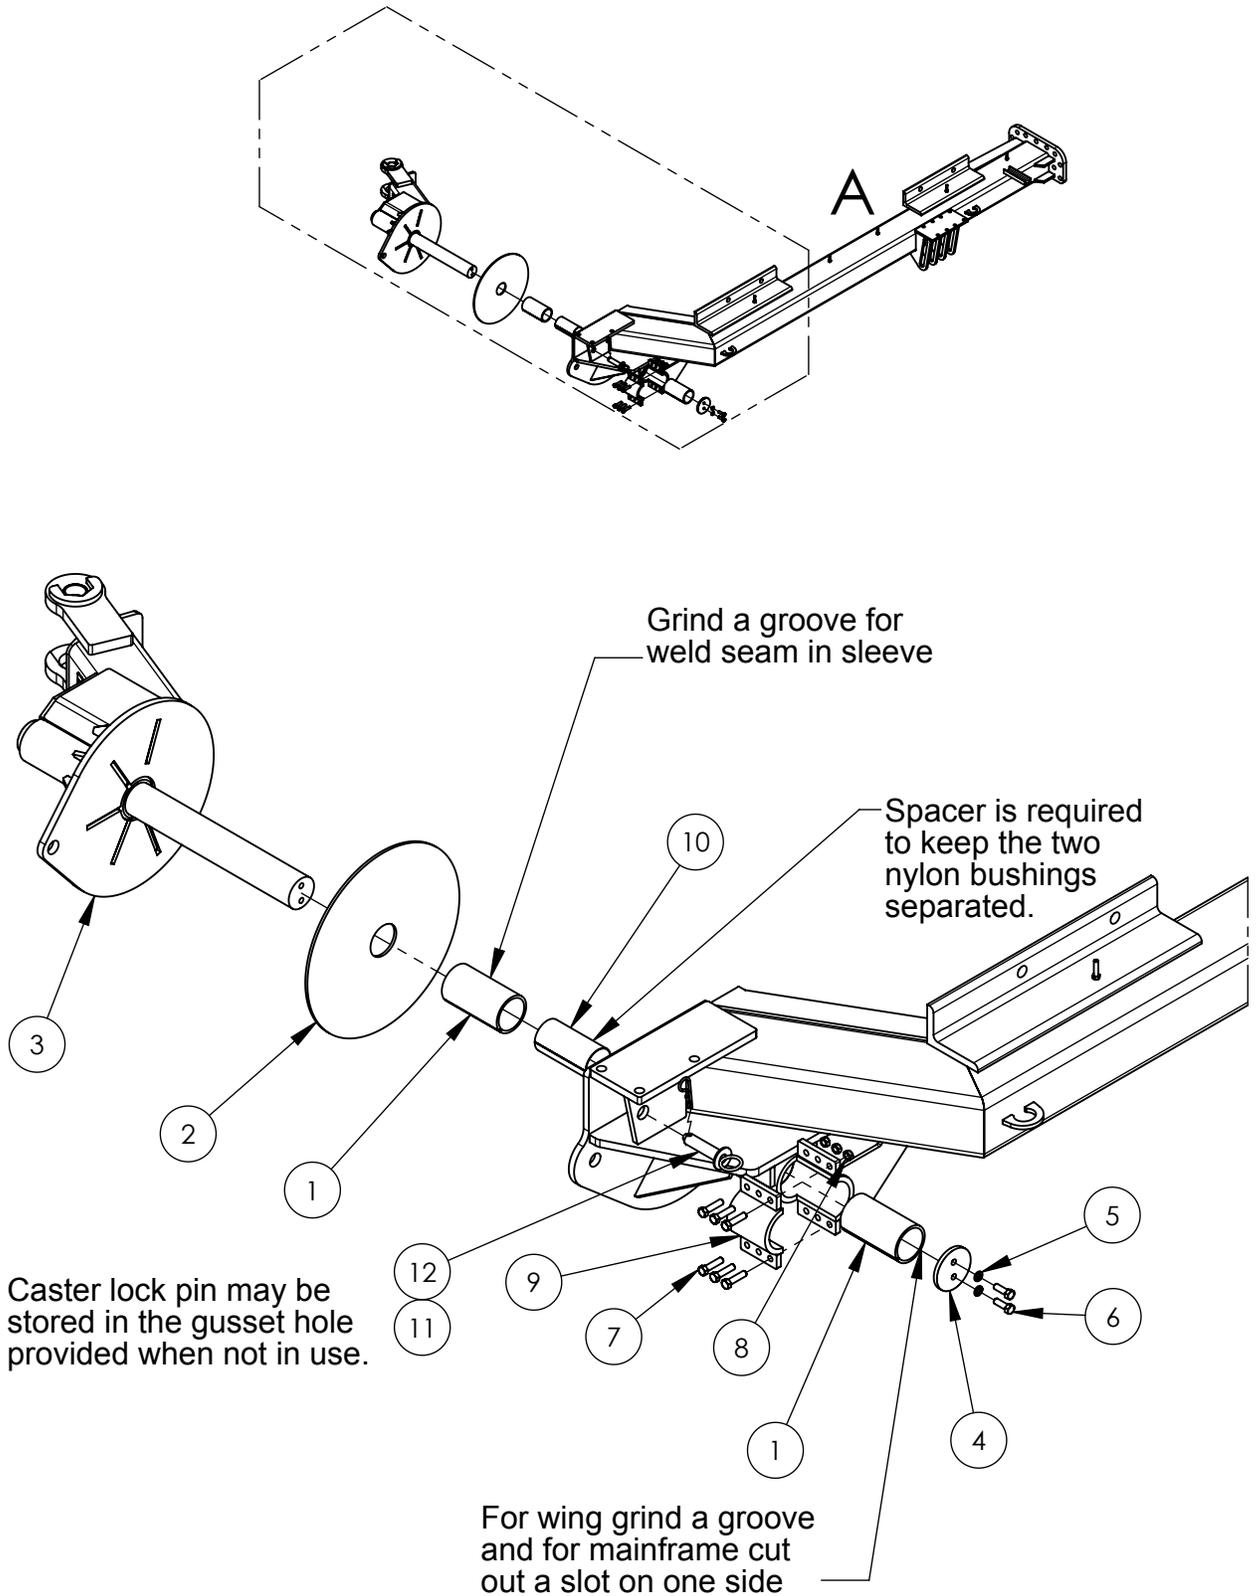

Hydraulics

- **DO NOT** search for high pressure hydraulic leaks without any hand and face protection. A tiny, almost invisible leak can penetrate skin, requiring immediate medical attention.
- Use cardboard or wood to detect leaks – never your hand.
- Double check that all is clear before operating hydraulics.
- **NEVER** remove hydraulic hoses or ends with machine elevated. Relieve hydraulic pressure before disconnecting hydraulic hoses or ends.
- Use transport/maintenance locks when machine is raised.
- Maintain proper hydraulic fluid levels.
- Keep all connectors clean for positive connections.
- Ensure all fittings and hoses are in good condition and are properly tightened.
- **NEVER** work on or under an elevated machine unless it has been locked up using the transport/maintenance locks.

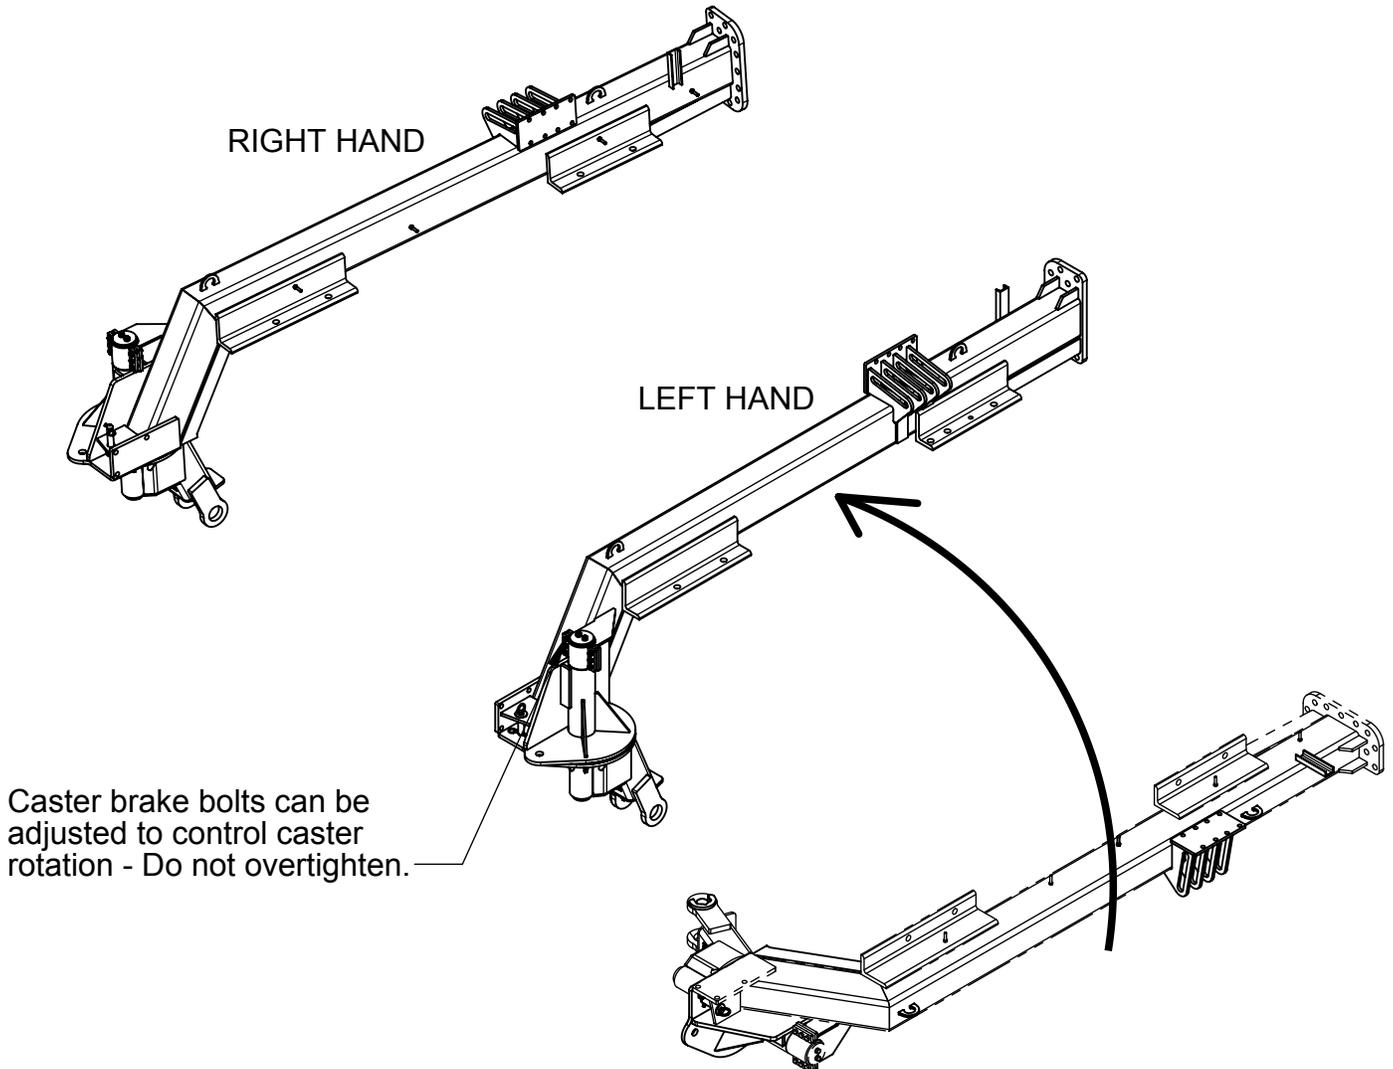

Main Caster Installation

Install casters into axle beams while beams are laying on their sides.

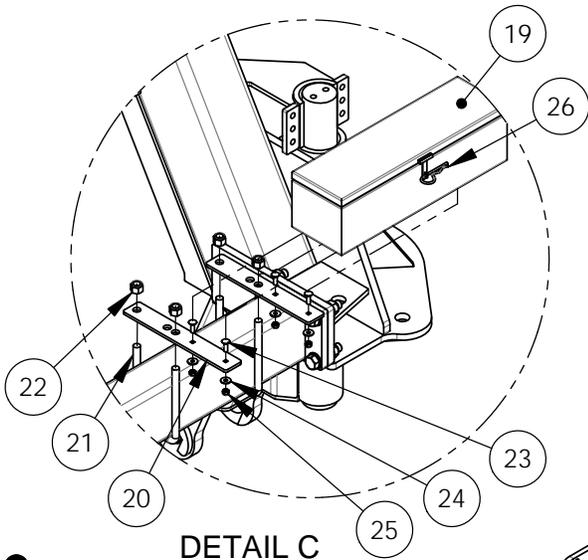

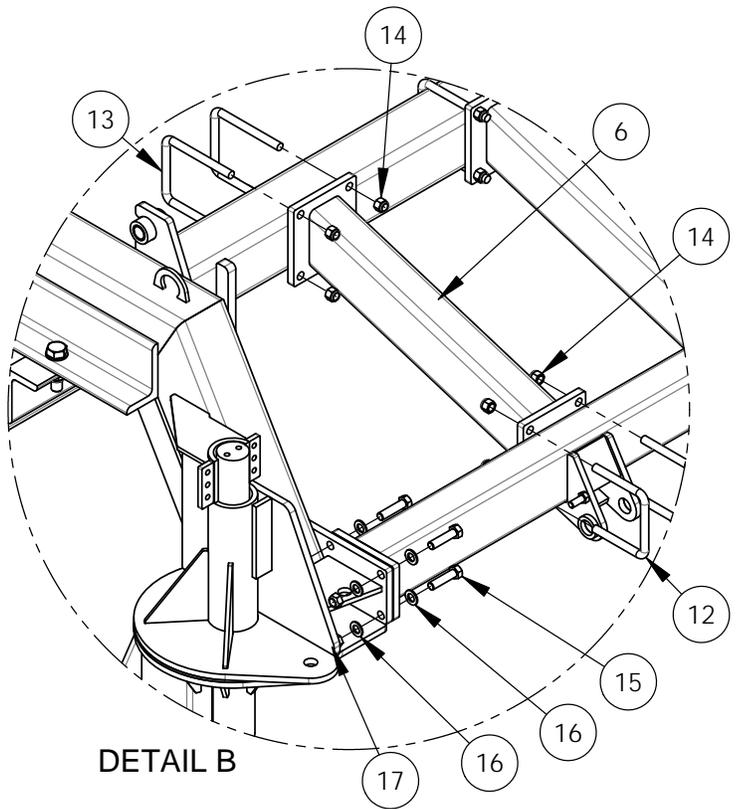

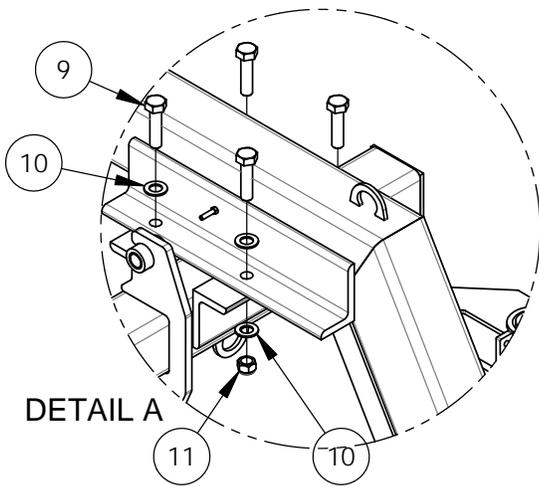

Main Caster Installation

ITEM	QTY	PART NO.	DESCRIPTION
1	4	P20001	3 1/2" OD x 3" ID x 6 1/2" NYLON BUSHING
2	2	T01073	520 CASTER WASHER 3" SHAFT
3	2	T01104	520 CASTER FOR GW13156 & GW19/4517 TIRES
4	2	FL00139	3/8" x 4" AIR DRILL CASTER WHEEL CAP
5	4	BL08	1/2" SPRING WASHER
6	4	B0815	1/2 X 1 1/2" GR. 5 PLATED BOLT
7	12	B0820	1/2" NC x 2" LG. HEX BOLT GR. 5
8	12	BN08S	1/2"-13NC STOVER LOCK NUT
9	2	T01933	520 3 1/2" FRONT CASTER BRAKE RETAINER
10	2	T01190	3" OD x 6" LG SPACER FOR CASTER BUSHING
11	2	GHP9	#9 HAIR PIN
12	2	GP1600414C04	1" x 4 1/4" RING & WASHER PIN

Axle beams can be flipped upright after casters are installed.

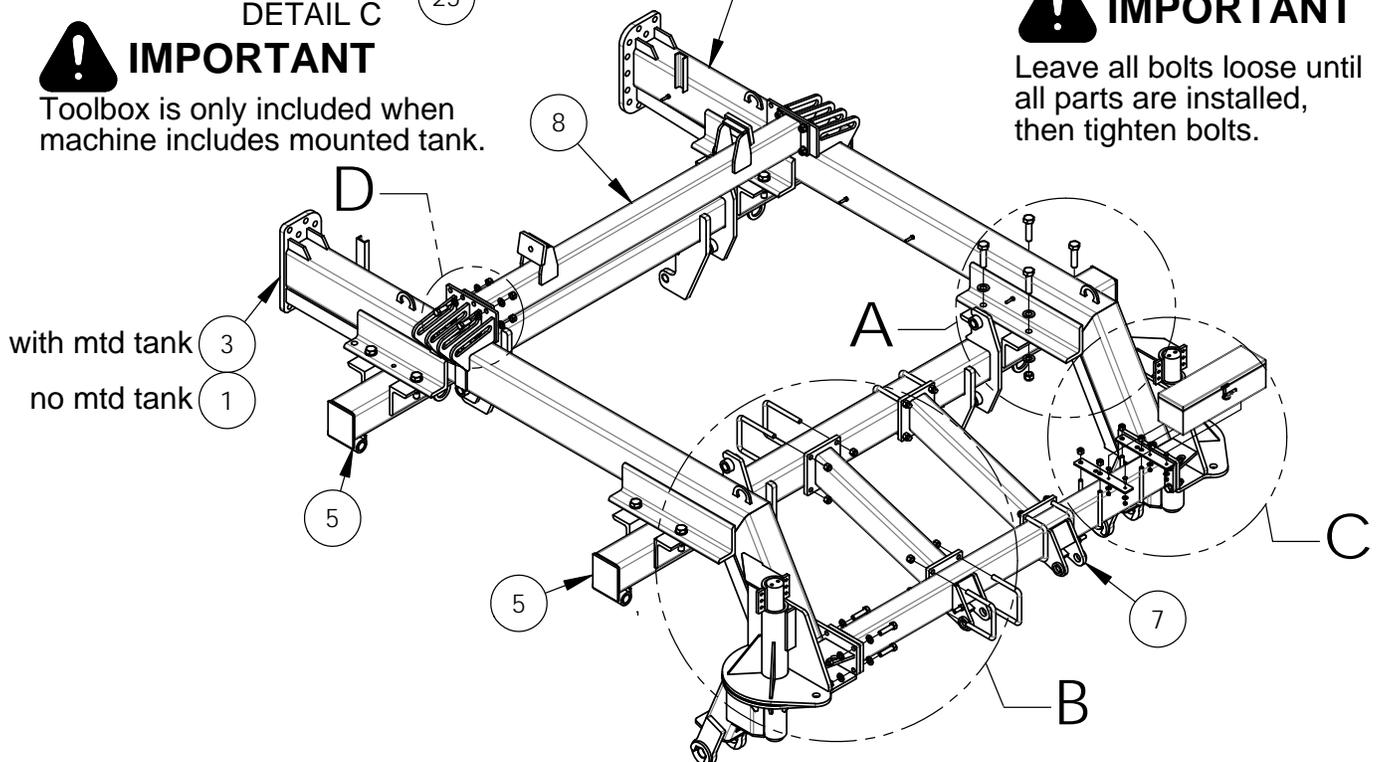

Main Frame Assembly

- 2 no mtd tank
- 4 with mtd tank

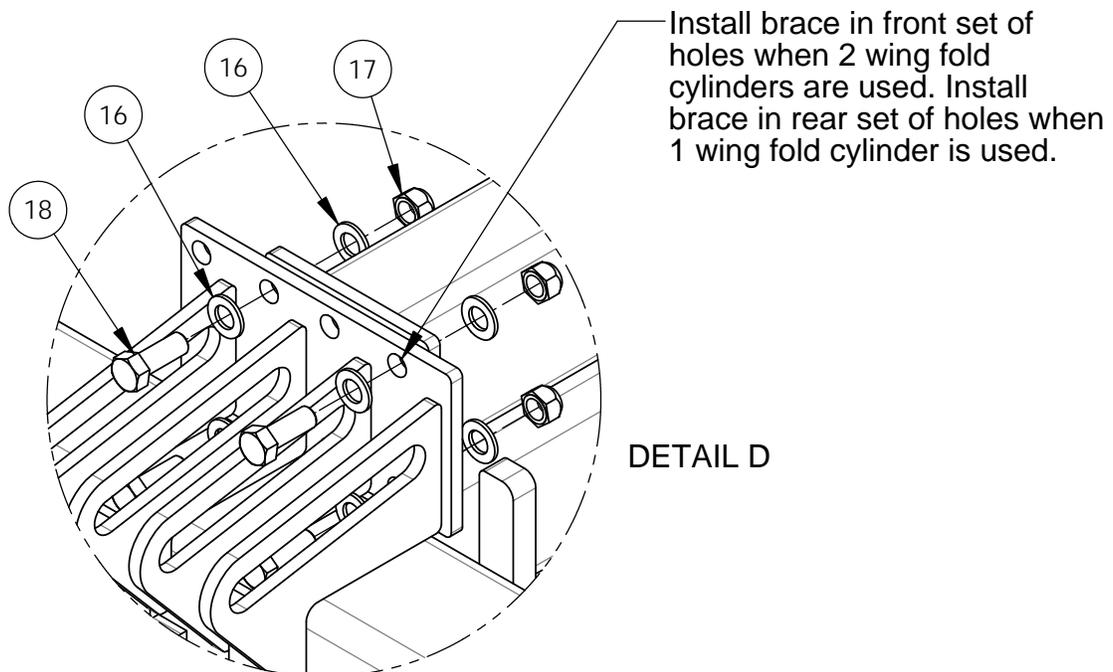

! IMPORTANT
 Toolbox is only included when machine includes mounted tank.

! IMPORTANT
 Leave all bolts loose until all parts are installed, then tighten bolts.

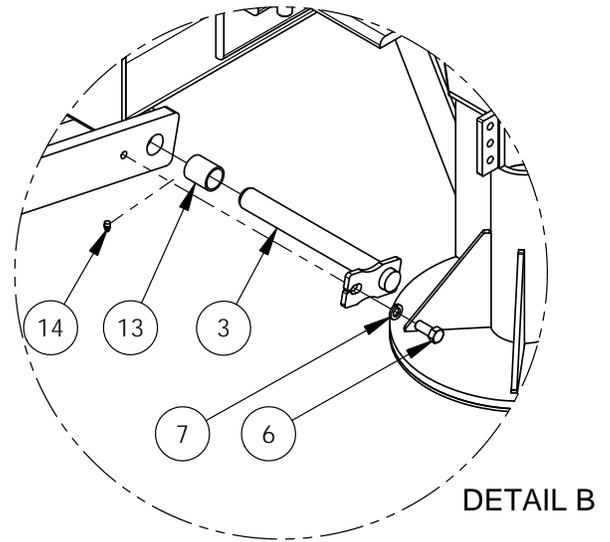

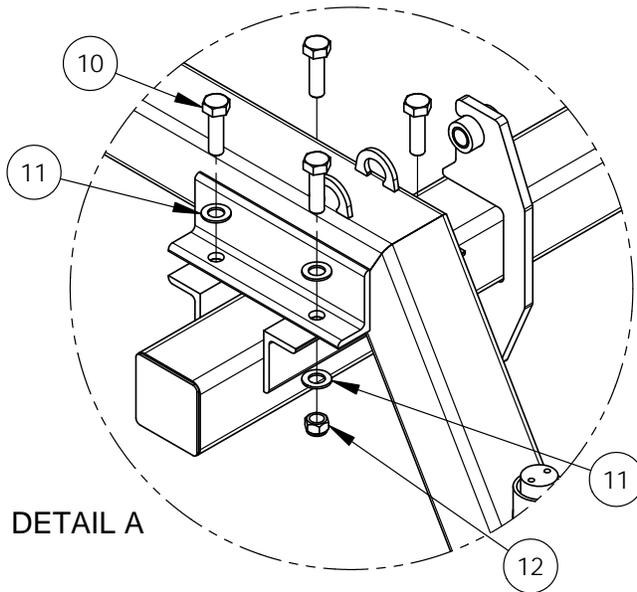

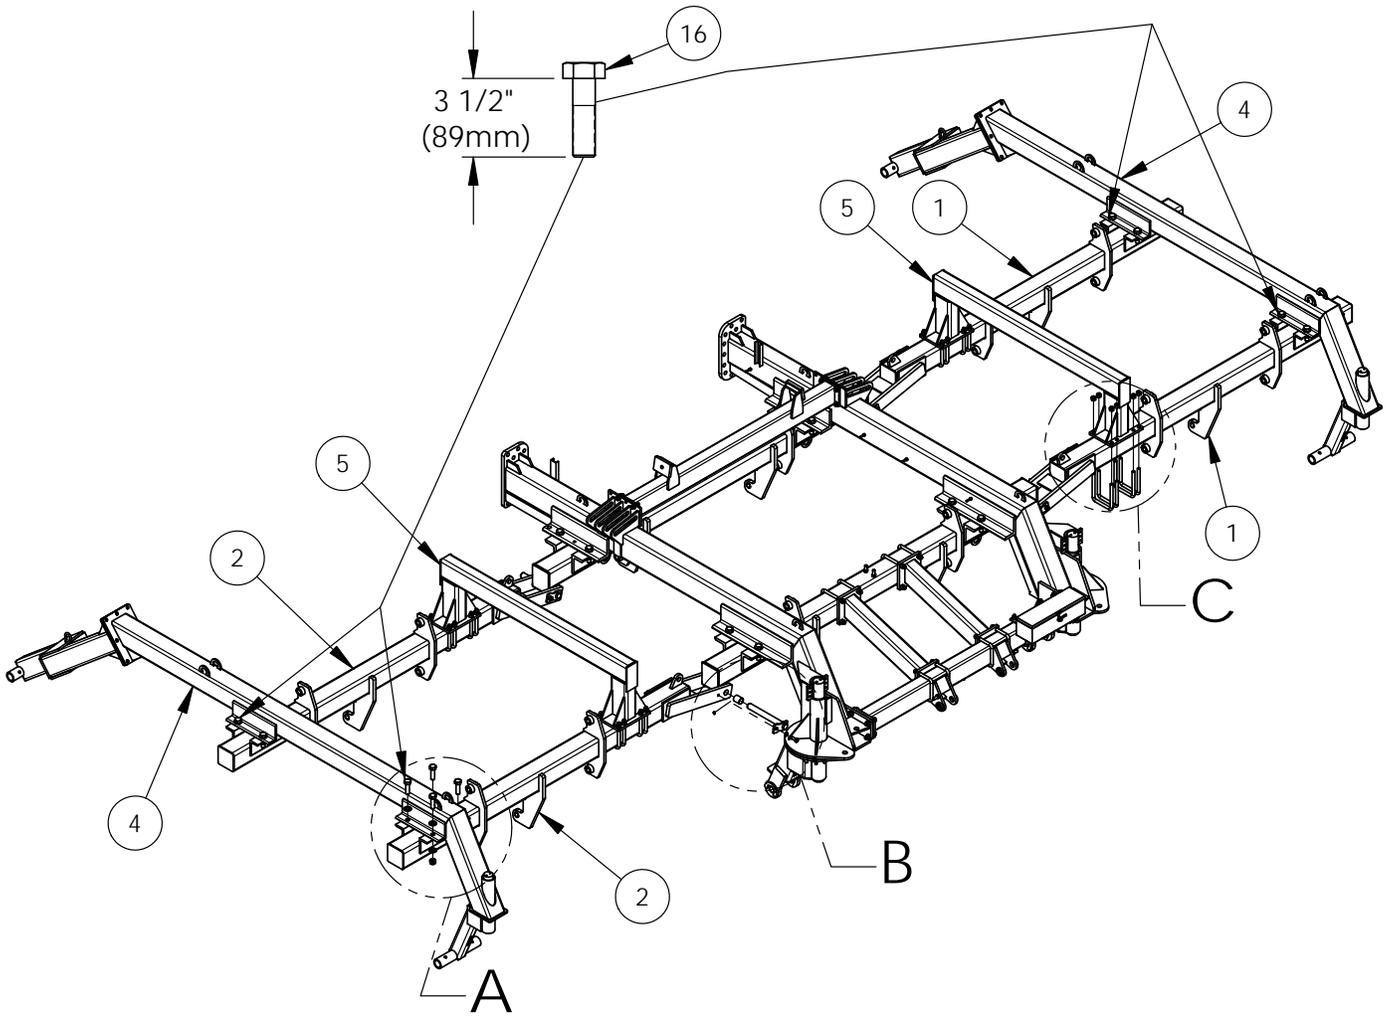

Main Frame Assembly

Assembled view without limit switch

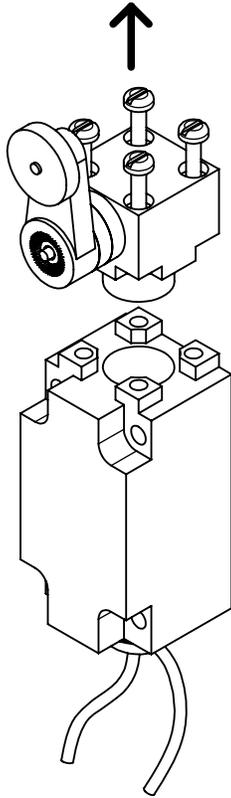

Limit Switch Rephasing Instructions

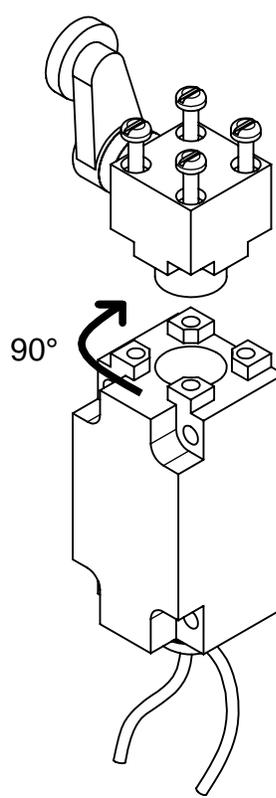

Roller arm limit switch should be rephased according to these instructions before using the drill for the first time in order to operate properly.

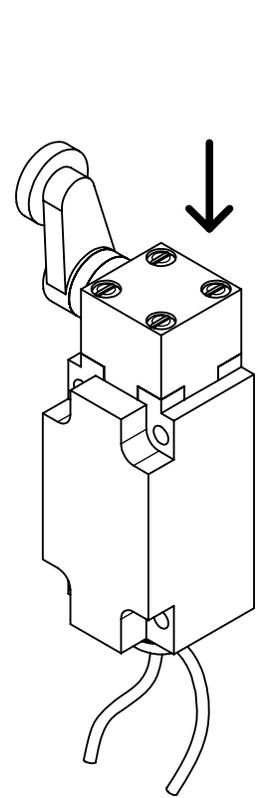

1) Remove 4 head screws **A**

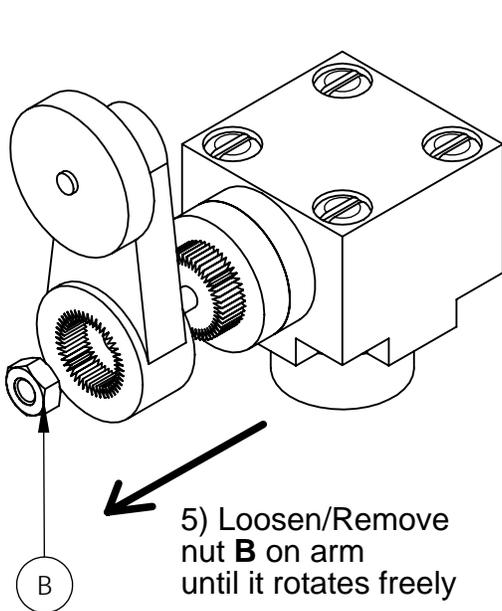

2) Lift head until it can rotate

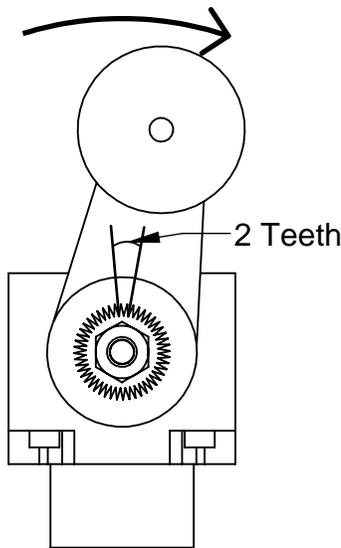

3) Rotate head 90° clockwise

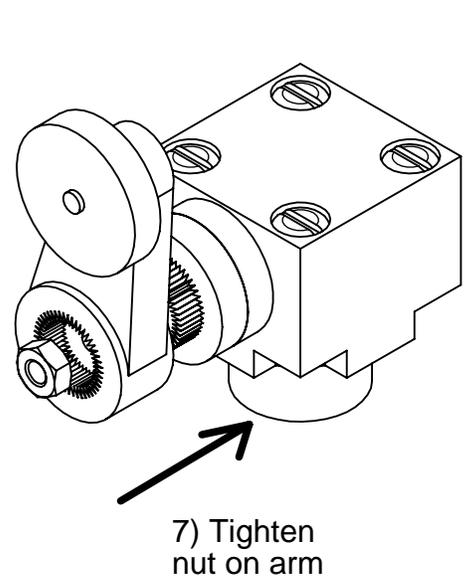

4) Reinsert screws and tighten

5) Loosen/Remove nut **B** on arm until it rotates freely

6) Rotate arm 2 teeth clockwise from straight up

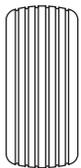

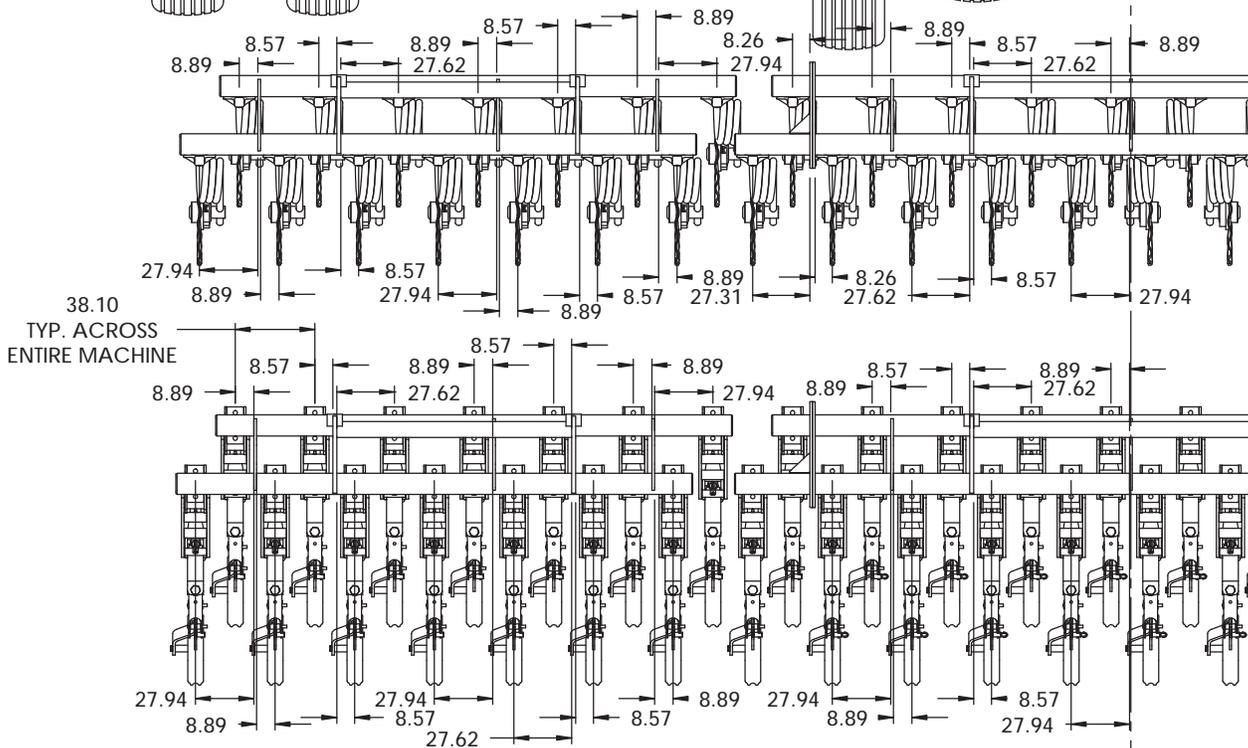

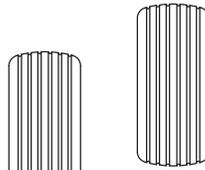

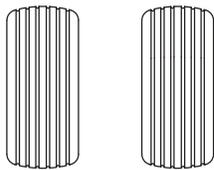

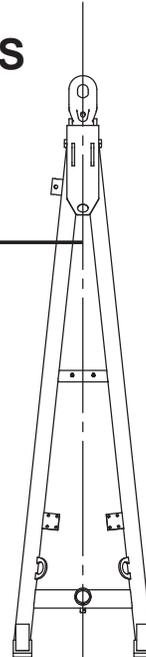

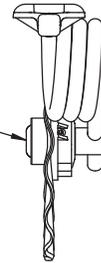

7) Tighten nut on arm

Coulters Assembly

*COLLAR, (21) ONLY REQUIRED AT NON-SWIVEL LOCATIONS, MARKED WITH A  ON COULTER LAYOUT

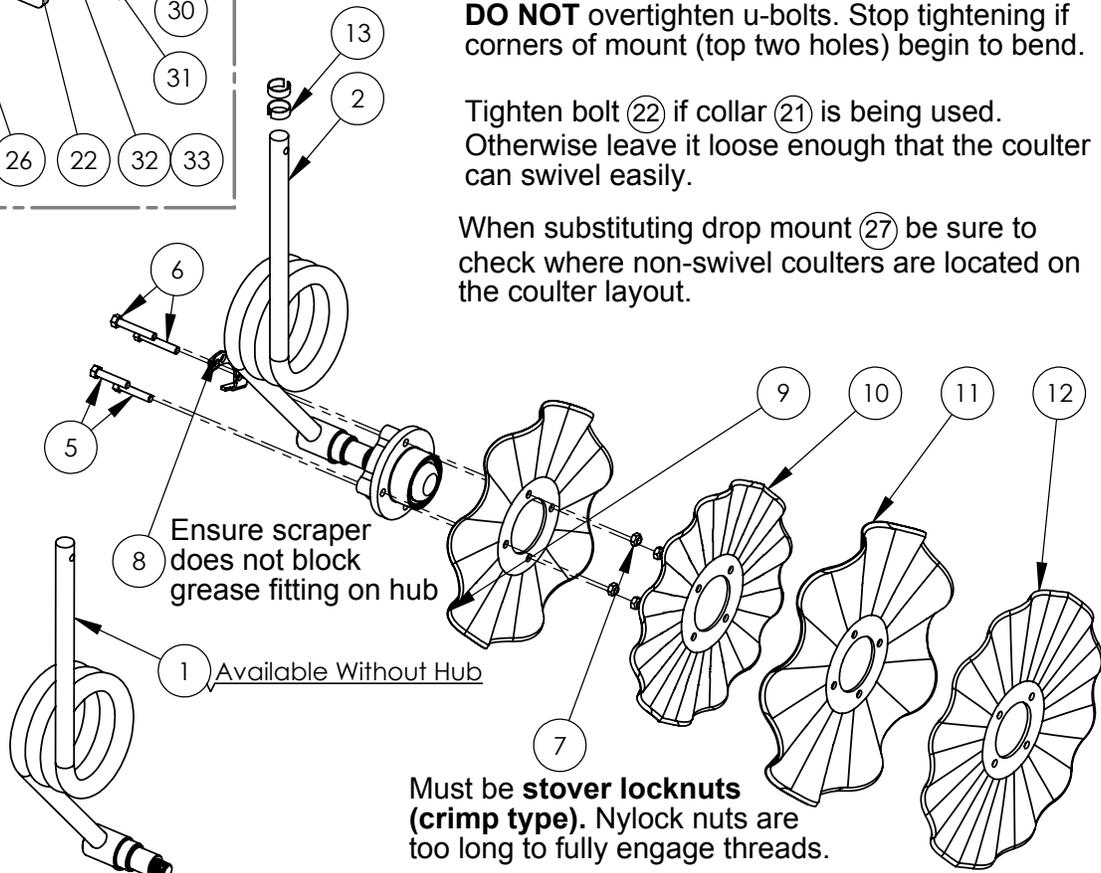

IMPORTANT

DO NOT overtighten u-bolts. Stop tightening if corners of mount (top two holes) begin to bend.

Tighten bolt (22) if collar (21) is being used. Otherwise leave it loose enough that the coulters can swivel easily.

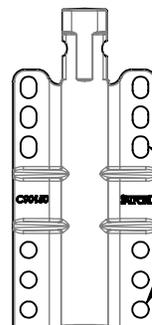

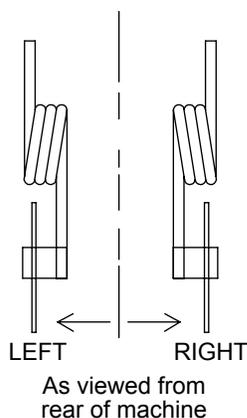

When substituting drop mount (27) be sure to check where non-swivel coulters are located on the coulters layout.

Coil-Tech Hub

! IMPORTANT

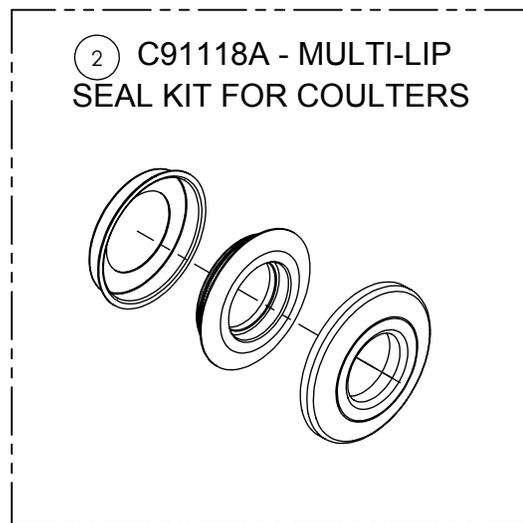

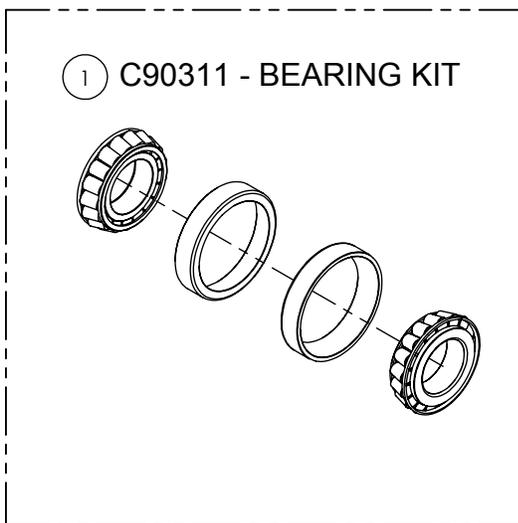

Recommended Install Procedure.
 Note: Bearings must be properly grease packed.
 1. Torque the spindle nut to 100 ft/lbs (135 Nm) to properly seat the bearings in the races. Always rotate the hub while tightening.
 2. Back spindle nut off until it is just loose.
 3. Re-torque to 40 (55 Nm) ft/lbs while rotating the hub.
 4. Adjust the nut to align the nearest slot with the hole in the spindle. Hub must be able to rotated relatively freely. Also it should be tight enough so that it cannot slide back and forth on the spindle more than .005" (0.13mm).

Opener Front Section Parts

Opener parallel link bushing kit.

T00504

When inserting seed tube, make sure tab is inserted into hole.

Insert small spring into large spring when installing.

Whisker should be tight against the blades when fully assembled with even pressure on both sides.
Set lowest point on whisker $\pm 1/4"$ from intended seeding depth to ensure that it rides on top of ground while in operation.

IMPORTANT NOTE
Install enough shims until blades just briefly touch, a slight loss of contact during rotation is acceptable.
Refer to operator manual for detailed opener blade contact setting.

RH LH
See important note on following page.

IMPORTANT

Connect only the Barrel end of the cylinders until the circuit has been charged.

1. Be sure that all cylinders can extend completely without striking anything. Prop with blocks if necessary.
2. Connect Tractor.
3. Extend cylinders and hold lever for 2-3 minutes. This will purge the air from the circuit. (The lift cylinders have a port that allows oil to pass when completely extended.)
4. The circuit is now free from air. Install Rod end Pins.

Whenever air could have entered the cylinders, repeat above steps to purge circuit

12	1	470	15' - 5"	TEE	RH WING CYLINDER BARREL
13	4	53	1' - 9"	REAR CYLINDERS	FRONT CYLINDERS

CHARGING WING FOLD CYLINDERS

IMPORTANT: Do not connect the cylinder rods until system has been charged with oil.

1. Prop up the cylinder with a block of wood so the rod can extend without striking anything.
2. Hitch to tractor and connect hoses. (note: check to see that all the cylinders move in the same direction. If not, then switch the rod and barrel hoses of the cylinder(s) moving backward.)
3. Extend cylinders completely. Hold lever for 30 seconds as air exits the cylinder.
4. Retract cylinders completely. Hold lever for 30 seconds.
5. Repeat three times.
6. Install cylinder pins. Be sure washers are installed correctly (see cylinder page).

CAUTION

7. When folding for the first time, or when new hardware is installed, check that cylinders and fittings do not collide with the wing frame when fully folded. If so, use an alternate plug in the cylinder, or simply rotate cylinder 180 degrees.

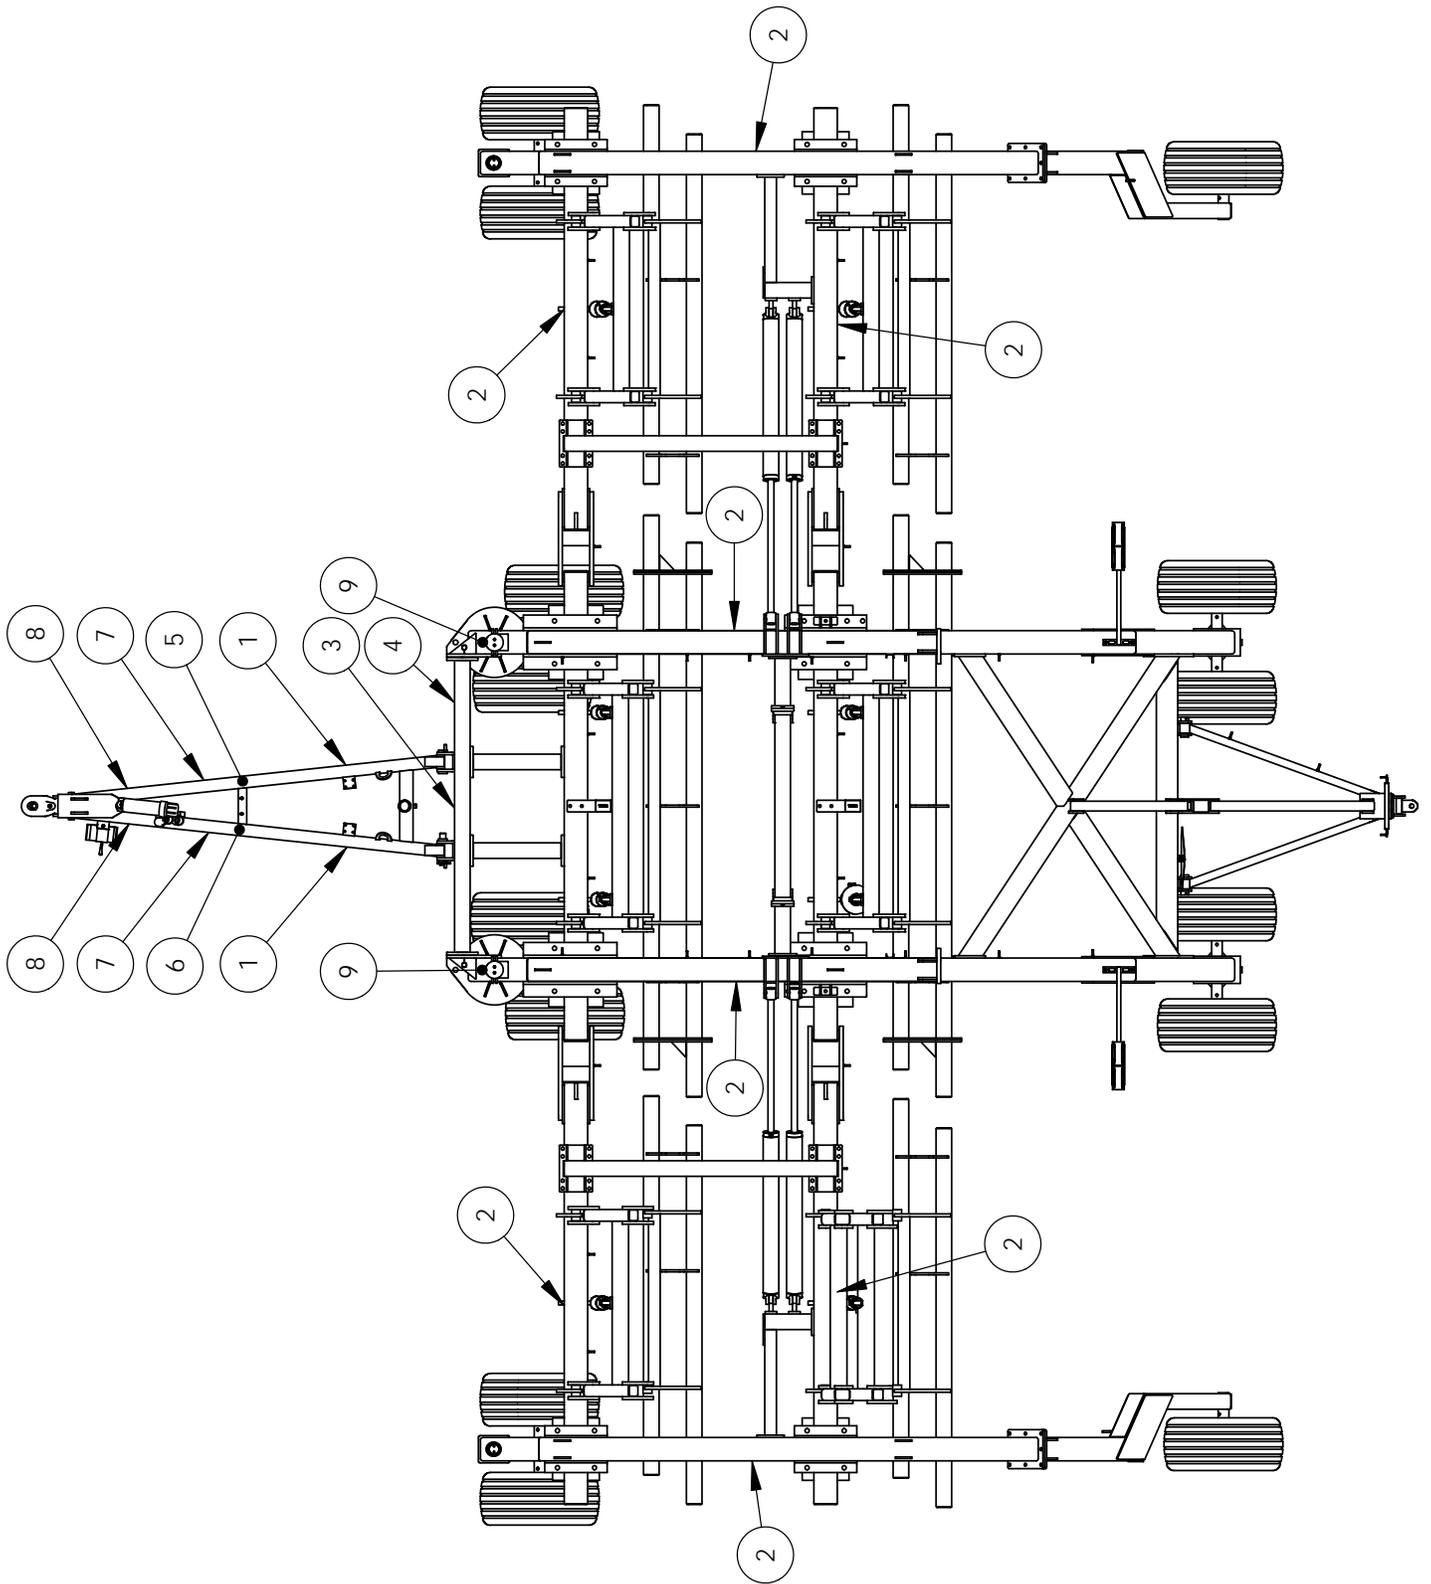

DANGER

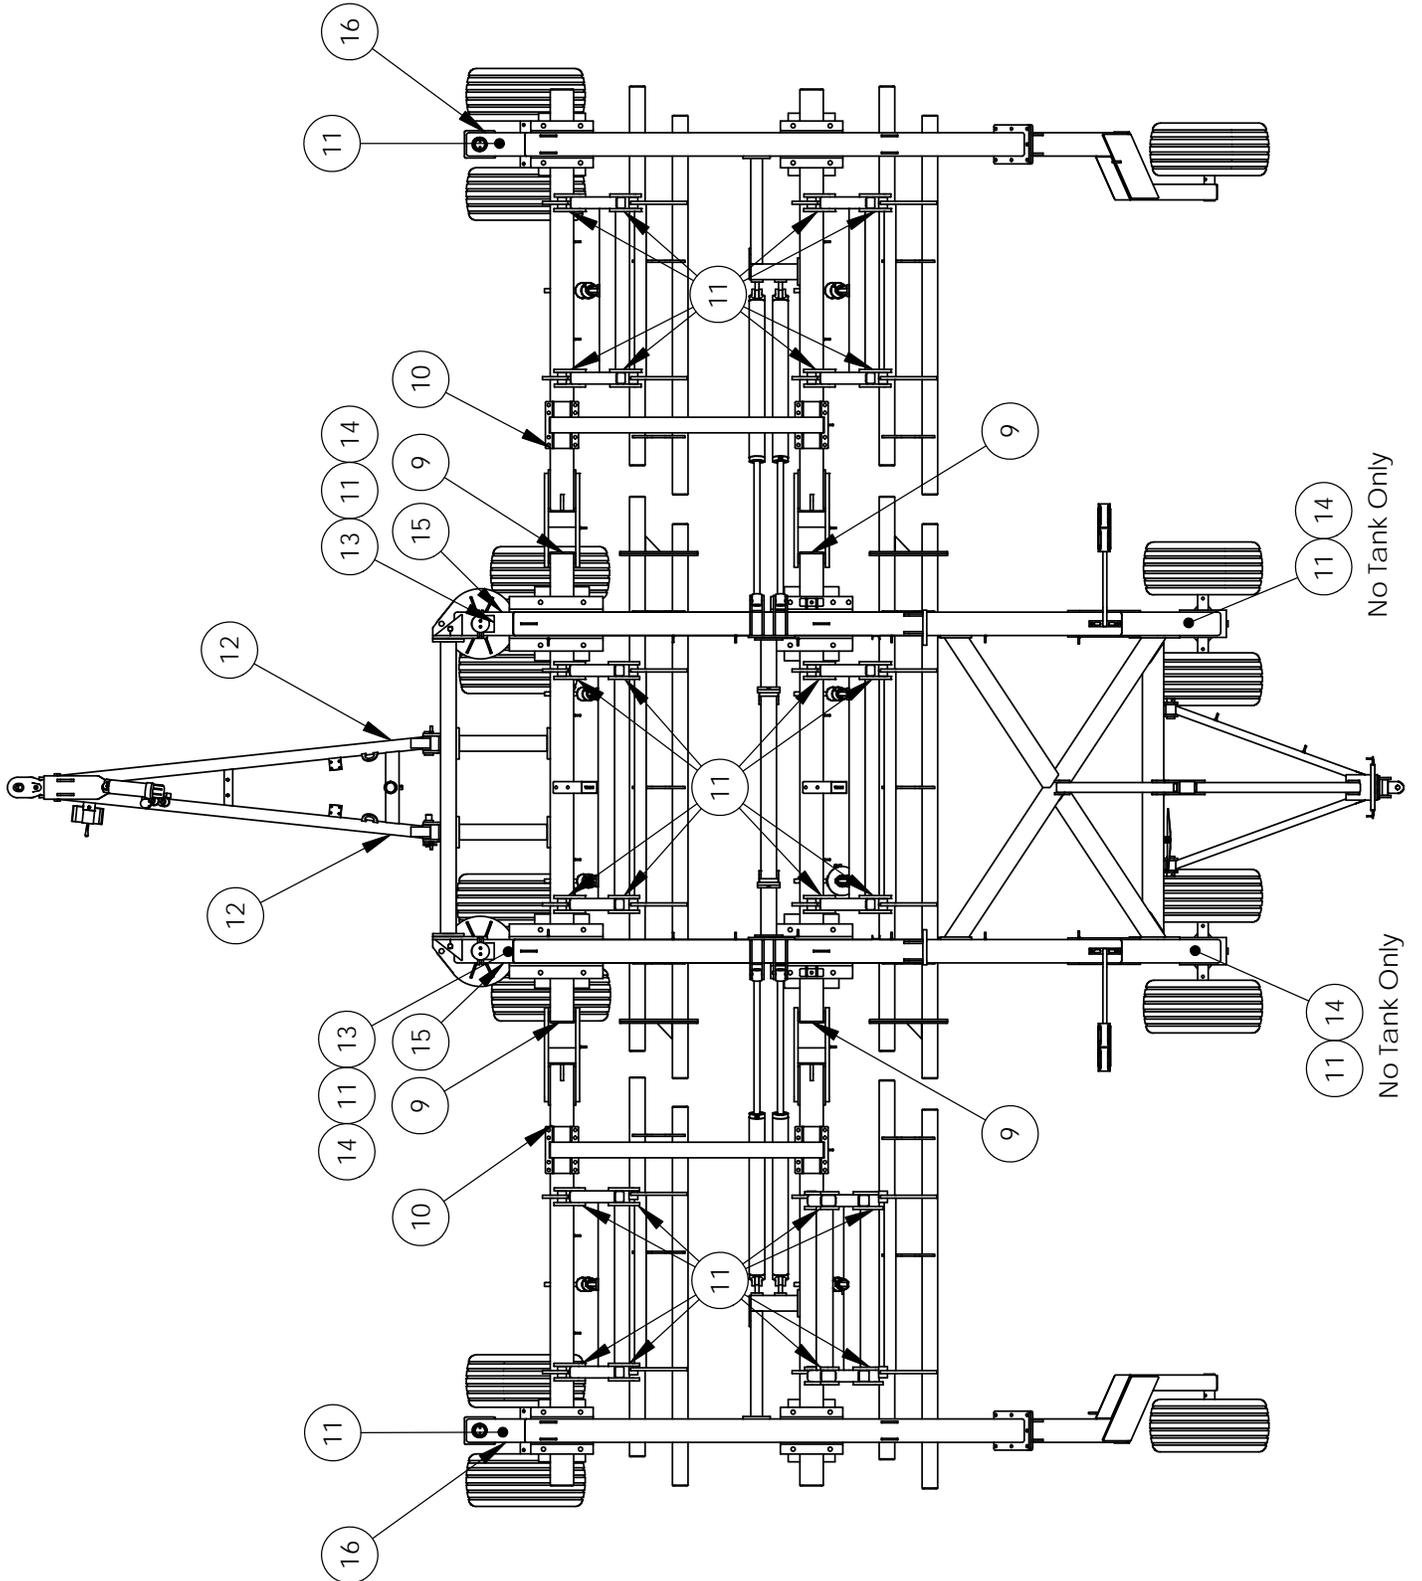

Air in the wing cylinders will cause wings to fall to the ground!!! Whenever air could have entered the cylinders, repeat the process above to purge circuit.

Never work on a lift system with the wings folded!!! ALWAYS UNFOLD WINGS before working on hydraulics!!

Decal List

ITEM	QTY.	PART NO.	DESCRIPTION
1	2	GD102	WWW. SALFORD DECAL
2	8	GD100	SALFORD DECAL LARGE w/BLACK BORDER (4" HIGH X 16" LONG)
3	1	GD112	ATTENTION LUBRICATE DECAL
4	1	GD110	WARNING DON'T LIFT DECAL
5	1	GDSW112	520 - THIS VALVE CONTROLS FRONT TOOLBAR
6	1	GDSW113	520 - THIS VALVE CONTROLS REAR TOOLBAR
7	2	GDSW2	USE PROPER TOOLS AND READ MANUAL DECAL
8	2	GDT3	DANGER STICKER FOR CRUSHING HAZARD "HITCHING IMPLEMENT TO TRACTOR PINCH POINT"
9	6	GDSW200	WARNING STICKER OVERHEAD CRUSHING HAZARD
10	2	GD144	WING LOCK DECAL - 570
11	30	GD10840	GREASE EVERY 40 HOURS DECAL
12	2	GD520	MODEL 520 DECAL
13	2	GDSW110	520 - GANGS MUST BE LIFTED BEFORE FOLDING WINGS
14	4	GD108	HIDDEN GREASE FITTINGS DECAL
15	2	GD194	8 LUG TIGHTENING SEQUENCE DECAL
16	2	GD193	6 LUG TIGHTENING SEQUENCE DECAL
